SUMMARY

Skilled in programming languages like **Python** and **Javascript**, with a specialization in building applications using **Django Rest Framework** and **Django**, I have hands-on experience in building robust web applications with secure and optimized backend.

I also specialize in building applications using **ReactJS,** I have experience in applications that are dynamic, efficient, and up to standards in today's industrial demands.

I am a tech enthusiast with great analytical precision and problem-solving skills at my disposal. I can write efficient code and can adapt to any programming language across all platforms.

What sets me apart is not just my technical skills but also my willingness to always learn and adapt to new industrial trends and practices.

What I bring to the table is a hardworking and creative mind that won't backdown from the opportunity to learn with unwavering attention to detail and always striving to bring excellence.

EDUCATION

Bachelors in Information Technology
Phoenix College of Management / kathmandu / March, 2021 - Present
In my final sixth semester of college

FullStack with Django and React js

Dursikshya Education Network / 2023

Completed FullStack course on Python with Django and React js at Durshiksya education network taught by program director and instructor Rajendra Kandel. In this course, I was able to learn from the basics of HTML/CSS/javascript to react js and Python with Django and how to integrate them with restful API.

✚ PORTFOLIO

Mero-Pasal

An e-commerce fullstack web application that uses React js as the frontend and is connected with Django backend with rest API.

Features of this project include:

• User registration, token authentication, and 3-level access control as admin, seller, and user.
 • Ability to reset the password via email link.
 • Product creation, update, and deletion by seller or admin.
 • Add to cart, single order, or multiple orders
 • E-sewa payment integration.
 • Dynamic website with proper security.

https://github.com/PramitKhatri/Mero-Pasal

Django ecommerce website

I learned Django by making an ecommerce website using the Django framework and integrating E-sewa payment system.

https://github.com/PramitKhatri/ecommerce-learn

Tourism Website

A django project that allows CRUD operation to add, update, delete various locations and the provinces it belongs to. It implements the basics of CRUD to make a Django application.

https://github.com/PramitKhatri/tourism-website

React ecommerce site

Made a React e-commerce application that has full cart functionality and uses API to receive data for the products.

https://github.com/PramitKhatri/React_app

Forest Website clone

Practicing frontend development https://p.w3layouts.com/demos_new/template_demo/17-12-2018/forest-demo_Free/2069386206/web/index.html using nothing but HTML/CSS. By doing this, I learned quite a lot about web design and various UI elements.
